OVERVIEW

### Add another layer to your career

Learn how to produce 2D drawings, 3D models and digital presentations using Revit Architecture software. Revit's parametric technology means you can make a change anywhere in the building project and it automatically updates the whole project. Gain skills in creating and editing building components, library items, structural framing systems, dimensioning and annotating as well as setting up views and title sheets. An ideal short course for architects, building designers, interior designers and technicians.
